Re: AstroTurf GameDay Grass 3D product with astroflect heat reduction technology at The Meadows School

Dear Mr. Raiger:

I would like to take a moment to tell you how much value the AstroTurf GameDay Grass 3D product installed by General Sports Venue last year has added to our school.

The students from both the Upper School and the Middle School use the field every day all day long for their physical education classes and extracurricular activities. Thanks to the astroflect heat reduction technology, the Las Vegas heat is no longer a factor in whether or not the field can be used each day, and the students no longer have to worry about whether or not the field will be wet and mushy from watering. Even with the daily wear and tear, the AstroTurf continues to hold up well and has proven itself to be a quality product.

It was also a pleasure to partner with General Sports Venue and General Acrylics as the general contractor in resurfacing the track and field. The work was completed within the allotted budget and ahead of schedule, with no problems along the way. This was appreciated by all.

If you would like to schedule a site visit with any prospective customers, please feel free to call me at (702) 249-5333.

Sincerely,

Bret L. Peterson
Director of Facilities
