

UNIVERSITY OF OREGON

August 21, 2009

Dear Synthetic Turf Selection Committee,

I am writing to offer my recommendation for the services of AstroTurf® in the installation of their synthetic turf field products.

We just took possession of our new AstroTurf® GameDay 3D field and couldn't be more pleased with the result. We have been most impressed with the expertise and accommodating personal qualities of Reed McNeil and other staff who maintained constant contact with university staff in seeing this project through to completion.

We found the professional knowledge they brought to the table in explaining the benefits of various turf and infill system options to be most helpful in making informed decisions.

The installation crew assigned to our project by AstroTurf was extremely professional, timely, and sought our input throughout to make sure we were getting just what we wanted.

In this age of sustainability awareness by university students and staff, we are particularly pleased with the environmentally friendly construction and renewability of the AstroTurf® products.

A few students have been out testing the new field already and are thrilled with this great new addition to their recreational opportunities at University of Oregon.

AstroTurf® synthetic turf products come to you with my highest recommendation.

Sincerely,

Dennis Munroe, Director
